

No	Test case brief name	Priority(P0/P1/P2)	Related requirements	Preconditions	Step No	Step description	Expected result
1	Create new team	P0	Req1.1	User is logged in as admin; the season has not started yet	1	Open the "Teams" module	A list of existing teams is displayed
					2	Click on the "Add team" button	A new team creation form appears
					3	Enter team name and select age category (e.g., U13)	Form fields accept the input
					4	Click the "Save" or "Create" button	The team is added to the team list
					5	Verify the team is stored	Team appears in the interface and database
2	Edit team details	P0	Req1.2	Team already exists; user is logged in as admin or assigned coach; season has not started yet	1	Open the "Teams" module	List of teams is displayed
					2	Select a team from the list	Team details are shown
					3	Click on the "Edit" button	Team edit form is opened
					4	Modify the team name and change age category	Fields are editable and accept changes
					5	Click "Save"	Changes are saved
					6	Verify that the new data is visible in the team list	Updated name/category appears in the interface
3	Delete team	P0	Req1.3	Team exists; user is logged in as admin; no matches have been generated yet	1	Open the "Teams" module	List of teams is displayed
					2	Select a team to delete	Team details appear
					3	Click the "Delete" button	Confirmation dialog is shown
					4	Confirm deletion	Team is removed from the list
					5	Verify team is no longer visible in the team list	Team does not appear in the interface
					6	Check database for removed team	Team data is deleted from storage
4	Add new referee	P0	Req2.1	User is logged in as admin	1	Open the "Referees" module	List of referees is displayed
					2	Click on the "Add referee" button	Referee creation form is shown
					3	Fill in referee name, date of birth, experience count (e.g., 0)	Fields accept input
					4	(Optional) Upload profile photo	Image upload is accepted or skipped
					5	Click "Save"	Referee is added to the list
					6	Verify referee appears in the list with correct data	Referee is visible with entered attributes
5	Generate season fixtures	P0	Req3.1, Req3.2, Req3.3	User is logged in as admin; teams are already created in each age category; no matches currently exist	1	Open the "Season Management" or "Matches" module	Interface shows "Generate Season" button
					2	Click on "Generate Season"	System prompts confirmation or age group selection
					3	Confirm generation	System processes fixture generation using round-robin logic
					4	Wait for generation to complete	User sees loading or progress bar (optional)
					5	View generated schedule	Schedule is displayed week-by-week for each category
					6	Verify number of matches per round	Expected number of matches appears per tour (≈ 20 per group)

6	Automatically assign referees to matches	P0	Req4.1, Req4.2, Req4.3	Matches are already generated Referees exist with defined experience values User is logged in as admin	1	Open the "Matches" or "Assignments" module	Matches are listed, some marked as "No referee assigned"
					2	Click on "Auto-assign referees" button	Assignment process is triggered
					3	System processes assignments based on referee experience and balance	Each match is assigned a referee within their allowed age group
					4	Verify that each referee was not assigned to overlapping matches	No time conflicts occur
					5	Check distribution among referees	Referee workloads are approximately balanced
					6	Open a match and view the assigned referee	Referee name appears in match info
7	Referee submits match report	P0	Req5.1 – Req5.4	Match has been played Referee is logged into the system Referee is assigned to the match	1	Referee logs in and opens "My Matches"	Assigned matches are displayed
					2	Select a finished match from the list	Match detail view is opened
					3	Click on "Submit Report"	Report form appears
					4	Enter final score, red cards, and optional comments	Fields accept input
					5	Click "Submit"	Report is saved and match is locked for further editing
					6	Attempt to edit report again	System denies changes (read-only after submission)
8	Update league table after match report	P0	Req6.1 – Req6.5	At least one match report has been submitted League table already exists for the relevant age category	1	Submit a match report (see Test Case 7)	Report is accepted and saved
					2	Open "League Table" module	League table is displayed
					3	Locate teams that played the match	Their positions in the table are visible
					4	Verify updated points and goal difference	Points (3 win, 1 draw, 0 loss), GD, and GF are updated accordingly
					5	Check sorting order	Teams are sorted by points → goal difference → goals scored
					6	Filter standings by age category (e.g., U15)	Table updates to show only that category
9	Player can view only their team's data	P1	Req7.1	User is logged in as a player The player is assigned to a specific team Matches and league tables exist	1	Log in as a player	System authenticates and shows player interface
					2	Open "Matches" or "My Schedule"	Only matches involving the player's team are displayed
					3	Try to open another team's schedule (e.g., via direct link)	Access is denied or redirected to own team
					4	Open "League Table"	Full table is shown, or only player's age group category (optional)
					5	Attempt to edit or delete any data	All editing options are disabled / hidden
10	Coach edits team roster	P1	Req1.5, Req7.2	User is logged in as coach The coach is assigned to a specific team The season has not started yet	1	Log in as coach	System loads coach interface
					2	Open "My Team" or "Team Management" module	Coach's own team appears
					3	Click "Edit Roster"	Form with current players is shown
					4	Add new player (name, DOB, jersey number)	New player is added to the list
					5	Edit or remove existing player	Changes are applied and saved
					6	Attempt to access other teams' rosters	Access is denied or redirected
11	Referee sees and edits only assigned matches	P1	Req5.1, Req7.3	User is logged in as a referee Referee is assigned to some matches	1	Log in as referee	Referee interface is loaded
					2	Open "My Matches" module	Only matches assigned to this referee are displayed

				Other matches exist in the system	3	Try to access another referee's match (e.g., direct URL access)	Access is denied or redirected
					4	Click on assigned match	Match details and "Submit Report" option appear
					5	Try to edit a match not assigned to referee	System blocks access to report submission
12	Admin edits match details manually	P1	Req4.5, Req8.1 – Req8.5	User is logged in as admin Match has already been generated No match report has been submitted yet	1	Open "Matches" module	List of matches is shown
					2	Select a match to edit	Match detail page is displayed
					3	Click "Edit" button	Editable fields (date, time, location, referee) are unlocked
					4	Change the date and select a different referee	Fields accept the changes
					5	Save the changes	Match is updated in the schedule
					6	Open the match again	New values are visible
					7	Try to edit a match with submitted report	Edit option is disabled or blocked
13	Admin views referee statistics	P1	Req9.1 – Req9.5	Referees exist with match history User is logged in as admin or referee	1	Open "Referees" module	List of referees is displayed
					2	Click on a referee to view stats	Referee detail page opens with total match count
					3	Apply filter for a specific time range (e.g., this month)	Stats update accordingly
					4	Check breakdown by age category (U11–U19)	Numbers are shown per group if data exists
					5	Log in as referee	Referee can only see their own stats
					6	Try to export data (if feature exists)	CSV file is downloaded or export screen appears (P2 if available)
